

BUILDING THE PERFECT WAKEBOARD BOAT

PUMP INSTRUCTIONS

STEPS TO FILL YOUR BLADDER

1. Attach the female end of the “Blue Union” to the male end of the hose.
2. Attach the male end of the “Blue Union” to the Fill/Drain valve of the bladder.
3. Submerge the entire pump into the water.
4. Plug the 12-volt adapter into the 12-volt power outlet in your boat.

At this time the bladder should begin to fill with water.

If the bladder does not begin to fill with water...

- Prime the pump by unplugging the 12-volt adapter and re-inserting it into the power source several times.

STEPS TO DRAIN YOUR BLADDER

1. Attach the “Blue Union” to the threaded end of the pump.
2. Insert the “Blue Union” into the Fill/Drain valve of the bladder and hang the hose over the gunnel (the side of the boat).
3. Plug the 12-volt adapter into the 12-volt power outlet in your boat.

At this time, the bladder should begin to drain.

If the bladder does not begin to drain...

- Prime the pump by pushing down on the pump attached to the bladder. This will force the water into the pump.

THANK YOU FOR CHOOSING SKYLON.
